

# FIRST GRADE UNIT I

## WHAT'S THE WEATHER LIKE TODAY?

**Central Idea:** The measurable changes of the weather impact our lives.

In this unit students inquired into the weather and seasons. They discussed various types of weather and how temperatures and climates differ around the world. Students learned to measure, record, and track temperatures. First grade learned about graphs, interpreting data, and the use of symbols.

IM students recorded temperature data and illustrated the weather.

### LINES OF INQUIRY:

An inquiry into how the weather changes in our environment

An inquiry into the changes caused by the change in seasons

An inquiry into the tracking of the weather changes

### Next unit:

Students will be inquiring into the different types of landforms, the world we live in, and cultural values. Students will also learn about patriotism and how it differs in demonstration from country to country.

IG illustrated weather vocabulary!

IM illustrated weather using various materials.

IS2 illustrated the phases of rain to snow!

Students illustrated precipitation from liquid to solid phases.

ISI created weather reports on various cities!
