Third Grade Unit 3

Money, Money, Money!

Central idea: Societies with their individuals strive to maintain the distribution of resources and their appropriate values.

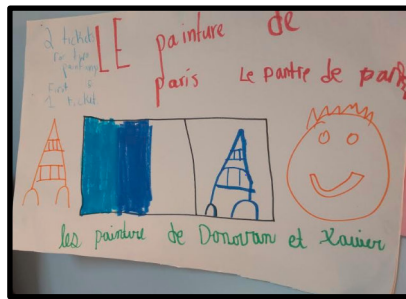

In Unit 3, students learned about the connections between consumers, producers, products, and goods and services. Students learned about the consequences of spending money, and how it affects our society. Third grade had so much fun working on their business plans for Markey Day! For this, students were able to experience the work that goes into a business including a business plan, advertising, developing the product or service, budgeting, and customer service!

Lines of Inquiry

An inquiry into money

An inquiry into the interrelatedness of resources

An inquiry into the choices we make as consumers

Various work from 3rd grade's Market Day!

Upcoming Unit

In this upcoming unit titled "Saving Our World!" students will be learning about plants and animals, how organisms are connected to their habitat, and how humans can help discover solutions for pollution. Students will discuss the problem in our world with pollution and how it is affecting the plants, animals, and their habitats.
